

Ashin R

Marthandam, Kanyakumari
Ashinravindran4@gmail.com | 6374161566

AI and Data Science student with a clear focus on machine learning, data analysis, and predictive modeling using Python. Proficient in interpreting model outcomes and communicating results effectively. Eager to leverage AI for practical problem-solving.

Professional Experience

Ndimensionz PVT LTD, Infopark, Kochi **05/2026 - 06/2026**
Linux And AWS Intern

- Worked with Linux commands, system administration, AWS services, server configuration, security monitoring, and troubleshooting.
- Gained practical experience in cloud computing and Linux-based environments.

Nex-X Sparks, Nagercoil **06/2026**
Research And Development Intern

- Research and Development internship focused on exploring emerging technologies and developing practical technical solutions.
- Worked on research, development, and implementation of technology-based solutions. Gained practical experience in problem-solving, programming, project development, and applying technical concepts to real-world challenges.

Education

St. Xavier's Catholic College of Engineering **2024**
B.Tech Artificial Intelligence And Data Science - 8.84

- Currently pursuing B.Tech in Artificial Intelligence and Data Science, with a strong interest in AI, machine learning, data science, and software development.

Projects

AI-Powered Linux Administration & Security Assistant

- Developed a Python-based AI assistant that converts natural-language requests into Linux commands and performs system administration tasks.
- Implemented system health monitoring for CPU, memory, disk usage, and active users.
- Built ML-based security threat detection using Random Forest by analyzing Linux authentication logs.
- Integrated Explainable AI (XAI) for threat reasoning and Telegram alerts for suspicious login activity.

Flutter AI Expense Tracker

- Developed a Flutter-based personal finance app that detects transaction notifications received on the device.
- Extracted and analyzed transaction details such as amount, income, and expenses from notifications.
- Automatically categorized transactions and maintained income and expense records.
- Provided users with a clear overview of their spending and financial activity.

Key Skills

- Programming: Python, Java, JavaScript, Dart
- Machine Learning: Machine Learning, Artificial Intelligence, Predictive Modeling, Explainable AI
- Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, OpenCV, PyTorch, TensorFlow, Django, Flask, Flutter
- Web Development: HTML, CSS, JavaScript, Django, Flask
- Databases: MySQL, SQLite, MongoDB
- Cloud & Systems: Linux, AWS, Git, GitHub
- Data & Visualization: Power BI, Matplotlib

Interests

- Artificial Intelligence & Machine Learning
- Software & Full-Stack Development
- Cybersecurity & Linux
- Data Science & Analytics
- Innovative Projects
